Marine Shelter		
Location	Depth	
Paraquita Bay Lagoon	6-8 ft at entrance, 6-8 ft at bay	

Shelter Classifications

Primary shelters can provide refuge during and after a hazard like a storm or earthquake and are equipped with generators as well as facilities for shelterees to cook and bathe.

Secondary shelters can provide refuge during and after a hazard but don't have as many of the facilities as a primary shelter and would house shelterees for a shorter period of time.

Tertiary shelters can provide refuge after a hazard and would only host shelterees temporarily.

*Facility currently in use by shelterees
